

SUPERIOR SURFACE ENHANCEMENT

Generate More Revenue with Ceramic Layering Technology

Castle is the first Australian company to formulate ceramics into Tri Foams, Protectants, and Drying Aids through advanced technology. This development will enable ceramic based products to be layered over the top of each other. This will create a far greater gloss finish and to repel water that improves the drying capabilities.

CERAMIC HAS MORE BENEFITS THAN WAX
(less expensive than carnauba wax)

Ceramic Layering Proven Performance

Ceramic Layering, High Lubricity Tri Colour Foam Conditioner

Ceramic Tri Colour Foam Conditioner is a part of our 3-part Ceramic layering program, exhibits high foaming in 3 vibrant colours (RED, YELLOW, BLUE) with the infused layering ceramic technology to provide added shine and hydrophobicity. When Ceramic Tri Colour Foam Conditioner is used in conjunction with Ceramic Turbo Gloss+ and Ceramic Sheen & Dry, will create incredible water break with a deep penetrating "slick surface feel" and a magnified shine.

Ceramic Protectant

Ceramic Turbo Gloss+ is a part of our 3-part Ceramic layering program. A next level ceramic layering technology designed to really create a "WOW" factor, providing a silky smooth, polished surface that really enhances the vehicles gloss. Provides a gloss and finish that lets you "feel the shine!" Creates a hydrophobic ceramic shine on the vehicle surface and large water droplets that easily move off the car taking many surface contaminants with them as they go. Ceramic Turbo Gloss+ provides a long-lasting protective film which enhances paint work and provides protection from harmful contaminants such as Industrial fallout, acid rain, road grime, insect, and bird droppings.

Ceramic Layering Drying Agent

Ceramic Sheen & Dry forms part of our 3-step next level ceramic layering technology designed to really create a "WOW" factor from a drying agent, providing a silky smooth, polished surface that really enhances the vehicles gloss. Provides a gloss and finish that lets you "feel the shine!" Creates a hydrophobic ceramic shine on the vehicle surface and large water droplets that easily move off the car taking many surface contaminants with them as they go. Ceramic Sheen & Dry provides a long-lasting protective film which enhances paint work and provides protection from harmful contaminants such as Industrial fallout, acid rain, road grime, insect, and bird droppings.

Ceramic **TURBO GLOSS+**

30 day Protection

Ceramic is leading the way as a full body protectant. Technology today has allowed ceramic products to be introduced to car wash sites, auto's, tunnels and self serve. The ceramic actively bonds to the surface, which forms small beads to help in the removal of excess water. The finish is silky smooth and gives a high shine in a single pass.

Why Ceramics are Better than Wax

- Vibrant shine because of thinner protective layer
- Superior Protectant
- Better drying technology
- Increase durability
- High contact angle to help shed water
- Windows are cleaner/brighter
- Reduces water spotting by moving water more efficiently
