paper towel dispenser

Hand towel in roll form is the least expensive way to buy washroom paper. However, the in-use costs are higher as it is difficult to moderate the amount of paper used by each person.

Control the cost of paper towel usage by automatically regulating the amount of towel dispensed for each user.

Additionally, the DAT dispensers helps maintain the highest standards of hygiene by reducing hand-contact with the dispenser, thus minimising the chance of hand-contamination.

Code: DAT

The DAT suits 150m paper roll towel, also available at Castle (code: 61508CND).
