Alex Barber
Castle Chemicals
16 Rural Drive
Sandgate, NSW 2304

Dear Alex,

Subject: Castle Chemicals Testimonial

Lamattina Beverages currently use the following CIP cleaning chemicals in our juicing plant. We required food grade chemicals to conform to our Safe Quality Food Standards and Castle Chemicals were able to supply these to us at a competitive rate.

Extra Zip (Chlorinated, Dual hydroxide CIP cleaner)

Shift A Plus (Acidic Milk-Stone Remover)

Proxitane (Hydrogen Peroxide & Peroxyacetic Acid Mixture)

Kloralkafoam (Chlorinated Foaming Detergent) which we use as a general cleaner.

Lamattina Beverages have found Castle Chemicals representatives to be friendly and approachable on any issues regarding cleaning. They call on us quite regularly just to touch base and ensure there are no issues. Each one of the above chemicals performs the action that they are designed for. In the event that there is an issue they are only too happy to sit down with management and trial different methods of cleaning.

Regards

Carol Williamson
Quality/Laboratory Manager
Lamattina Beverages
