Alex Barber
Castle Chemicals
16 Rural Drive
Sandgate NSW 2304

Dear Alex,

Mildura Brewery have been using Castle Chemicals as their main supplier for process cleaning chemicals & sanitisers since 2010. We have found that the high quality of the products themselves, supported by excellent technical assistance, has enabled us to make some significant improvements in the both the efficiency & cost effectiveness of cleaning in all areas of the brewery.

In particular we have been really pleased with the performance of Castle Chemicals' flagship product, Alkasil, that is in effect the workhorse detergent used within all CIP applications throughout the brewery. We have also found the knowledgeable sales & technical staff to be both reliable & very helpful and for all these reasons Mildura Brewery would have no hesitation in recommending Castle Chemicals as a detergent supplier to other Craft & Microbrewers.

Yours sincerely

Rod Williams
Head Brewer
Mildura Brewery
