To whom it may concern,

Castle Chemicals has been a supplier to Rivchem for over 5 years. In this time Castle has assisted in developing our business and made us a stronger company in supplying cleaning chemicals.

The quality of product supplied by Castle is very highly rated and their customer support is first class.

What I really liked about Castle's approach was that they were focused on helping us increase our customer base, through solving solutions. Other companies are more interested in selling chemicals. Castle service and advice on solving solutions for our customers allows them to stay ahead of their competitors.

Castle provides one of the best service partnership in the "cleaning chemistry industry."

I have no hesitation in recommending Castle products and services to other companies interesting in becoming a Castle distributor.

Regards
