Post Harvest Food Processing Hygiene & Sanitation

Castle Chemicals Commitment

Castle is an Australian-owned 2nd-generation family business which operates from our manufacturer site in Newcastle NSW. We have supplied the post-harvest industry for over 40 years. Our experience in the field combined with our commitment to quality chemical solutions sets us apart from our competition.

ISO 9001, Quality Management Systems status became part of our culture in 1994. We have used this systems approach to business to drive continual improvement in product development, quality and process traceability.

Castle's Research & Manufacturing team continually works with our customers to improve our formulations, which has further strengthened our post-harvest product range. The major benefits has been the improvements in gloss longevity, film strength, dry time and reduce chance of film whitening.

A simple business strategy developed in 1972 by the late Des Barrack, the founder, still sets the standard for Castle Chemicals into the future. "We work hard to earn the loyalty of our customers by providing innovative quality products that get the job done, along with experience, service and training that is carefully designed to meet our customers needs."
