

PREPARE

High Strength Apple Wash

DESCRIPTION

PREPARE is a powerful concentrated formula, which removes mineral deposits, spray residues and most of all prepares the apple's natural wax surface, to accept wax .

PREPARE can be used in most apple processing systems. Add the required amount of PREPARE to the dump tank.

***This product complies with FOOD STANDARDS
AUSTRALIA NEW ZEALAND (FSANZ) code Standard 1.3.3***

METHOD OF APPLICATION:

Correct volume of water is to be calculated before commencing. Add PREPARE to the water dump.

For optimum results, maintain water dump between pH 2 - 3.

DIRECTIONS FOR USE:

Mix approximately 1 litre PREPARE to 100 litres water in water dump (require the volume of water in dump tank).

Achieving and maintaining the desired pH is easy by adding PREPARE to lower pH as needed.

Please note: To adjust the pH from 2- 3, add soda ash or agricultural lime to bring back between pH 6 - 8.

PACKAGING:

205 litres.

PREPARE

High Strength Apple Wash

CAUTION:

Chlorine is unstable in the presence of acid. DO NOT add chlorine to dump tank containing PREPARE.

CALCULATION TO MEASURE VOLUME OF WATER:

1 cubic metre = 1,000 litres water

Depth x Width x Length. Then, multiply by 100.
