

## MELON WAX

### Fruit Coating

#### Product Description:

Castle Chemical's MELON WAX is a food grade coating developed for waxing all types of melons. Waxing will preserve their appearance and control moisture loss.

#### Application:

Melons are washed or dry brushed to remove field dust and loose corky rind particles. Make sure the melons are fairly dry prior to waxing. After the wax has been applied make sure they pass through a cool air-drying chamber. At the end of the day, wash the brushes so they are clean and in good condition.

MELON WAX is applied neat. Apply with a Micron 2000 for best application. The melons should be well dampened by the spray, then emerge from the cool fans reasonable dry.

#### SHELF LIFE:

As a quality assured manufacturer, Castle Chemicals has a stringent Quality assurance programme. As part of this regime, the label on this product shows a batch number and date of manufacture. This product has a shelf life of 24 months from the label printed date of manufacture. This information contained herein is based on data considered accurate.
