## Draught San

### Beer Line Sanitiser - To be used in Conjunction with Draught Clean

#### Product Description:

Draught San is the second part of a very effective two-part beer line cleaner. Draught San, when used in conjunction with Draught Clean will remove build up and bacteria from all types of draught beer lines and systems. Draught San, (together with Draught Clean) is recommended to be used as per instructions once a week. Draught San is a concentrated Peroxide based Sanitiser, please read SDS (Safety Data Sheet) and Label before use.

#### Great for use on:

- Commercial Draught Beer System
- Domestic Draught Beer Systems
- Taps and fittings as a soaking solution
- Meets the requirements of Brewery Approval Standards
- Highly effective
- Easily removes heavy build up

#### Application:

##### Hand Mixing:

1. Mix 80mls of Draught Clean and 80mls of Draught San to every 5 litres of water (working solution). It is important to mix Draught Clean and Draught San separately into the water.
2. Pull working solution through the beer lines and soak for minimum 2-hour or over-night for best results.
3. Flush solution from beer lines with clean water. Using Test Papers, check that all chemicals have been flushed from the beer lines.
4. Connect beer and continue service

##### Use with Beer Line Cleaning / dosing Systems:

Advice for use with various systems is available, but clean as per instructions. Ensure pick up tubes are in the drum, free of cracks and are weighted to the bottom of the drum.

**Notes:** Brass fittings and fixtures should not be used in a draught beer line system. Brass will corrode and taint the beer. All brass fittings should be replaced with stainless steel 304/316 fittings.

##### Safety:

When using Draught San follow the safety directions on the label and wear appropriate personal protective equipment. Never mix Draught San and Draught Clean together in concentrated form.

**SHELF LIFE:** As a quality assured manufacturer, Castle Chemicals has a stringent Quality assurance programme. As part of this regime, the label on this product shows a batch number and date of manufacture. This product has a shelf life of 12 months from the label printed date of manufacture.
