Eucalypt

General Purpose Reodorant Disinfectant

Product Description:

A unique reodorant disinfectant exhibiting a high quality pure eucalyptus note, sustained by fixatives and boosters providing persistent residual effect and augmented with bactericidal compounds yielding marked antibacterial activity against a wide range of pathogenic micro organisms. Indicated to be used as an aid in the prevention of environmental cross infection particularly in toilets, washrooms and change rooms and wherever large groups of people gather in relatively confined spaces.

EUCALYPT is described as a 'Quick Break Detergent' and has been tested to break within the 20 minute parameter.

1. Pure high grade Australian Eucalyptus oil is used to give a clean fresh characteristic.
2. Possesses a sufficiently unusual complexity of odour notes to sustain interest and acceptance by visitors and employees.
3. Possesses sufficient persistence to be detectable throughout a normal working day. The persistence characteristic of Eucalypt increases with continual and exclusive use.
4. Provides a warm, clean, pleasing, air freshening effect which overcomes mal-odours.
5. Contains no phosphates.
6. Acts in three ways:
 - a. As a disinfectant - kills bacteria.
 - b. As a reodorant - removes and destroys odours.
 - c. As a deodorant - leaves a fresh effect.
7. Kills the species of bacteria commonly found and transmitted in toilet and washroom areas.
8. Effective as a disinfectant against a broad range of bacteria including: Staphylococcus Aureu, Escherichia Coli, within 5 minutes in a dilution of 1:60 in ordinary tap water.
9. Concentrated for economical use.
10. Safe for use in septic tanks.
11. Perfectly safe for use on skin when the desire is to employ the formulation as an antiseptic or as a reodorant.
12. Unconditional guarantee by the Company to perform as claimed by accredited representatives of the Company and in Company printed matter.

Application:

In general, it is suggested Eucalypt be diluted 1:60 with water. Swab solution liberally in toilet and washroom areas covering toilet bowls, urinals, handles and floors. DO NOT RINSE. Pour solution into grease traps and water traps. Dilute into a Castle Chemicals handsprayer and spray into normally inaccessible areas such as cracks and crevices etc., and for reodorising the general areas in enclosed spaces such as lifts, change rooms, air locks, air conditioning ducts, motor coaches, etc.

SHELF LIFE: As a quality assured manufacturer, Castle Chemicals has a stringent Quality assurance programme. As part of this regime, the label on this product shows a batch number and date of manufacture. This product has a shelf life of 12 months from the label printed date of manufacture. This information contained herein is based on data considered accurate. However, no warranty is expressed or implied regarding the accuracy of these data or the results to be obtained from the use thereof. Castle Chemicals assumes no responsibility for personal injury or property damage to vendees, users or third parties caused by the material. Such vendees or users assume all risks associated with the use of material.
