Friction

Slip Resistant Floor Cleaner for Vinyl Floor No Fragrance

Product Description:

FRICITION (No Fragrance) is a specifically designed heavy-duty floor cleaner that not only cleans and maintains the floor surface but also leaves the floor surface with slip resistant characteristics.

FRICITION (No Fragrance) is designed to suit all existing cleaning methods.

FRICITION (No Fragrance) has been specially formulated with microscopic particles of a specially developed slip reducing agent to increase the coefficient of friction of the floor surface, thus reducing the risk of slip fall accidents - particularly when wet.

FRICITION (No Fragrance) at full strength has a pH of 9.0 and is powerful enough to remove grease and dirt problems. As FRICITION (No Fragrance) is mixed and applied to the floor surface the pH reverts to a neutral 7.0. FRICITION (No Fragrance) leaves no alkali residues to attack the floor or produce slippery soaps when moisture comes into contact with the treated surface.

FRICITION (No Fragrance) can be used in conjunction with other floor sealing systems:

SUPA SEAL

ARMOUR

HI TECH 3342

Application:

MOPPING:

1. Mix 14 mls of FRICITION (No Fragrance) per litre of warm water in a mop bucket.
2. Apply solution to the entire floor area using a clean mop.
3. Ensure solution is changed and mop head is cleaned when it becomes dirty.
4. Pick up residual by dry mopping.
5. Allow to dry, then buff area if required using a white pad. (Change to a red pad occasionally).

AUTOMATIC SCRUBBING MACHINES:

1. Mix 12 mls of FRICITION (No Fragrance) per litre of warm water in the machine's solution tank.
2. Use as light a pad and pad pressure as possible to clean the floor.
3. Ensure scrubbing machine is set to apply sufficient quantities of the solution to the surface (insufficient quantity will leave surface streaks).
4. Areas that have been subjected to excessive dirt build up and heavy spills may require spot cleaning.
5. Allow to dry, then buff area using a white pad. (Change to red pad occasionally).

TRIGGER SPRAYING/SPRAY BUFFING:

1. Mix 1 part FRICITION (No Fragrance) to 10 parts cold water in a trigger sprayer.
2. Apply to a 'clean' floor using normal trigger spray procedures.
3. If buffing allow the machine to dry and polish in one pass.

Using too much solution or walking too fast may leave hazy streaks on the floor.

Pad Range: White to Red.

FRICITION (No Fragrance) was not designed to be a one application, permanent treatment. FRICITION (No Fragrance) fits into the normal cleaning routine already being used by the client, and will show improvements in the safety of the floor from the first application. Castle Cleaning Solution's recommendation is that four to five applications are applied before best results are achieved. Simply, the more often the floor is cleaned with FRICITION (No Fragrance), the safer the floor surface becomes.

Technical Bulletin

Solutions, Chemistry, Service

FRICION (No Fragrance) is non dangerous, non hazardous, non flammable and meets environmental requirements. FRICION (No Fragrance) is manufactured in Australia under the Federal Government Quality Assurance Scheme AS - 3901 and is completely biodegradable to Australian Standards AS 1792 - 1976.
