Krate-Wash

Heavy Duty Low Foam Chlorinated Food Crate Washer Detergent

Product Description:

KRATE-WASH is a heavy duty low foam crate machine washing detergent, which exhibits all the horsepower usually associated with concentrated powders together with all the advantages of a liquid. Krate-Wash can be used on stainless steel, ceramic and most plastic surfaces.

The process performs at a very low economical concentration in soft or hard water and removes all soils found in food processing crate cleaning. Krate-Wash reduces or eliminates foaming which clogs pumps and cushions the impact of the spray and is corrosion safe on all metals commonly used in the construction of commercial crate washing machines. Krate-Wash formulation uses biodegradable surfactants.

Application:

Krate-Wash is manufactured specifically for use in food processing crate washing machines. It should be dispensed by means of an electronic detergent feeder, which gives absolute control over detergent usage, resulting in minimum operating costs. Suggested Krate-wash concentration of 0.15% > 0.2%.

Food Safety Statement:

With regard to the use of this product as a cleaner and / or sanitiser that may have incidental contact with food:

- 1) The raw materials / ingredients of this product are permitted as 'processing aids' as listed under clause 12 of the Food Standard Code 1.3.3 (Food Standards Australia New Zealand FSANZ) or
- 2) Are Generally Regarded As Safe (GRAS) according to the US Food and Drug Administration (FDA) or are recognised in the US Code of Federal Regulations (CFR) Title 21 part 178 as indirect food additives.

When used in accordance with the directions described in this product technical bulletin, this product complies with these recognised food safety parameters.

SHELF LIFE: As a quality assured manufacturer, Castle Chemicals has a stringent Quality assurance programme. As part of this regime, the label on this product shows a batch number and date of manufacture. This product has a shelf life of 6 months from the label printed date of manufacture. This information contained herein is based on data considered accurate. However, no warranty is expressed or implied regarding the accuracy of these data or the results to be obtained from the use thereof. Castle Chemicals assumes no responsibility for personal injury or property damage to vendees, users or third parties caused by the material. Such vendees or users assume all risks associated with the use of material.
