

Technical Bulletin

Foam-Bac

Foaming Sanitiser

Product Description:

FOAM-BAC, a clear light blue liquid, is a powerful quaternary based sanitiser specifically formulated to include powerful synergistic foaming agents to allow application to all surfaces and improved contact time. FOAM-BAC is a non rinse sanitiser with a broad spectrum of applications wherever effective chemical sanitisation on surfaces is required.

Application:

FOAM-BAC should be applied through a foaming gun, either water or air pressure assisted to provide a dense clinging foam. Foam on, and saturate surface, then allow contact time for maximum effect. A contact time of 10 minutes is ideal, but microbiological swab testing can optimise this procedure for rapid plant clean / turnaround. It is always best to clean first, and then sanitise to optimise use of antimicrobial agent. Your Castle representative can advise on best pre sanitation cleaning options.

FOAM-BAC should be used at between 0.4 and 0.8% dilution through the foaming gun, the equivalent of 4 – 8ml in 1L water. A simple test strip evaluation method is available to test concentration of microbiological active.

Food Safety Statement/Fitness For Purpose:

With regard to the use of this product as a cleaner and / or sanitiser that may have incidental contact with food.

- 1) The raw materials / ingredients of this product are permitted as processing aids as listed under clause 12 of the Food Standard Code 1.3.3 (Food Standards Australia New Zealand FSANZ) or Are Generally Regarded As Safe (GRAS) according to the US Food and Drug Administration (FDA) or are recognised in the US Code of Federal Regulations (CFR) Title 21 part 178 as indirect food additives.
- 2) An FFP - Fit For Purpose Statement is available for this product when used in an export meat facility.

When used in accordance with the directions described in this product technical bulletin, this product complies with these recognised food safety parameters.

SHELF LIFE: As a quality assured manufacturer, Castle Chemicals has a stringent Quality assurance programme. As part of this regime, the label on this product shows a batch number and date of manufacture. This product has a shelf life of 24 months from the label printed date of manufacture. This information contained herein is based on data considered accurate. However, no warranty is expressed or implied regarding the accuracy of these data or the results to be obtained from the use thereof. Castle Chemicals assumes no responsibility for personal injury or property damage to vendees, users or third parties caused by the material. Such vendees or users assume all risks associated with the use of material.
