

AVOCARDO & PASSIONFRUIT WAX

Fruit Coating

Product Description:

Avocado & Passionfruit Wax is an effective coating to control shrinkage, which extends the shelf life of the product.

It lubricates the peel of the product to help minimise mechanical damage (product rubbing against each other) and aids in proper sizing. Avocado & Passionfruit Wax brings out the natural shine.

Application:

Apply Ag-Clean to assist with the removal of residues and soils. Make sure the fruit is dry before waxing. Apply Avocado & Passionfruit Wax through a Micron 2000 for best results.

The rate of application will vary depending on machinery. Generally use one litre to one tonne.

SHELF LIFE:

As a quality assured manufacturer, Castle Chemicals has a stringent Quality assurance programme. As part of this regime, the label on this product shows a batch number and date of manufacture. This product has a shelf life of 24 months from the label printed date of manufacture. This information contained herein is based on data considered accurate. However, no warranty is expressed or implied regarding the accuracy of these data or the results to be obtained from the use thereof. Castle Chemicals assumes no responsibility for personal injury or property damage to vendees, users or third parties caused by the material. Such vendees or users assume all risks associated with the use of material.
