Chemisonic

Ultrasonic Tank Cleaner for Ferrous Components

Product Description:

CHEMISONIC is a non-corrosive ultrasonic tank cleaner for ferrous engine parts. The product can be used for the aviation, transport and automobile rebuilding operations and is a biodegradable product.

CHEMISONIC is described as a "Quick Break Detergent" and has been tested to break within the 20-minute parameter.

CHEMISONIC cannot be used to clean aluminium and other reactive metals because this will etch, corrode and damage them. CHEMISONIC is an effective cleaner of steel, cast iron, copper.

CHEMISONIC is an easy to use and readily dilutable liquid. It dilutes to a stable solution that will not sludge or salt out.

Application:

CHEMISONIC is used at 20-25 mls (millilitres) per litre of water at 80°C in a ultrasonic tank.

SHELF LIFE: As a quality assured manufacturer, Castle Chemicals has a stringent Quality assurance programme. As part of this regime, the label on this product shows a batch number and date of manufacture. This product has a shelf life of 24 months from the label printed date of manufacture. This information contained herein is based on data considered accurate. However, no warranty is expressed or implied regarding the accuracy of these data or the results to be obtained from the use thereof. Castle Chemicals assumes no responsibility for personal injury or property damage to vendees, users or third parties caused by the material. Such vendees or users assume all risks associated with the use of material.
