Circuit

Cleaning Solvent

Product Description:

CIRCUIT is a colourless solvent with a distinctive odour formulated to provide the highest degree of performance and safety in the cleaning and degreasing of all electric and electronic and precision equipment.

Application:

CIRCUIT removes and floats away all oily and greasy contamination, quickly and completely, then air dries without residue.

The low surface tension penetrates and disperses water pockets and moisture, ensuring clean, dry ready to use components.

CIRCUIT has been formulated to meet the non-flammable requirement of the dangerous goods legislation of flash point above 60oC.

CIRCUIT is a powerful solvent although many plastics commonly associated with electrical equipment may be cleaned in complete safety.

CIRCUIT may be applied by spray, brush or drip methods. Parts should be cleaned to the required degree and then wiped or air dried.

SHELF LIFE: As a quality assured manufacturer, Castle Chemicals has a stringent Quality assurance programme. As part of this regime, the label on this product shows a batch number and date of manufacture. This product has a shelf life of 24 months from the label printed date of manufacture. This information contained herein is based on data considered accurate. However, no warranty is expressed or implied regarding the accuracy of these data or the results to be obtained from the use thereof. Castle Chemicals assumes no responsibility for personal injury or property damage to vendees, users or third parties caused by the material. Such vendees or users assume all risks associated with the use of material.
