

Technical Bulletin

Glint

General Purpose Hand Dishwashing Detergent

Product Description:

GLINT is a clear green liquid. It has been developed specifically as a dishwashing detergent and possesses excellent cleaning properties. It maintains lather throughout the washing up without development of greasy scum in the sink. GLINT maintains its cleaning properties in the hardest of waters. It will perform effectively even in sea water. Because of the excellent wetting qualities of GLINT, articles washed in it dry quickly and streak free to a sparkling finish.

Application:

GLINT may be added manually to the sink. A dessert spoon full is found to be adequate for the average wash up. Alternatively, GLINT may be dispensed through a proportional dispensing unit. This method of dispensing the detergent gives absolute control over detergent usage and reduces dishwashing costs to a minimum. The dispensing unit is fitted to the tap over the sink and delivers a predetermined proportion of detergent with water when the tap is turned on. The drum of GLINT can be stored tidily out of sight under the sink as the detergent is dispensed directly from the drum in which it is supplied. For normal dishwashing requirements, the proportioning unit should be set to deliver from 3 ml to 4 ml of GLINT per litre of water.

GLINT can be used in:

Hospitals, Clubs, Restaurants, Schools, Cafeterias, Hotels, Motels, Guest Houses, Convalescent Homes, Cafes, Household Kitchens. GLINT is easy on the hands: Biodegradable; Suitable for dispenser use; Comes packed in 4 X 5, 25 and 200 litre drums

Food Safety Statement/Fitness For Purpose:

With regard to the use of this product as a cleaner and / or sanitiser that may have incidental contact with food:

- 1) The raw materials / ingredients of this product are permitted as processing aids as listed under clause 12 of the Food Standard Code 1.3.3 (Food Standards Australia New Zealand FSANZ) or
- 2) Are Generally Regarded As Safe (GRAS) according to the US Food and Drug Administration (FDA) or are recognised in the US Code of Federal Regulations (CFR) Title 21 part 178 as indirect food additives.
- 3) An FFP - Fit For Purpose Statement is available for this product when used in an export meat facility.

When used in accordance with the directions described in this product technical bulletin, this product complies with these recognised food safety parameters.

SHELF LIFE: As a quality assured manufacturer, Castle Chemicals has a stringent Quality assurance programme.
