Koral

Combi Oven Rinse Additive Descaler

Product Description:

Neutralises detergent residue

Minimises water spot markings

A specialist concentrated rinse additive for use through the integral cleaning system on combination ovens. Dosed automatically following the oven's cleaning programme, KORAL neutralises any alkaline detergent residues and ensures an effective rinse process. KORAL will reduce water spot marking and help to control water scale if used regularly. Suitable for use in both atmospheric and non-atmospheric (pressurised) ovens.

Application:

KORAL must only be used via the integral dosage system on combination ovens. Concentration can be adjusted via the oven control panel to achieve a suitable level of rinse effectiveness. Typical dilution rate is between 0.25% - 0.5%. Care should always be taken when changing containers. Always ensure that chemical containers are located in a safe position.

NB. Only use in combination ovens with an approved WRC backflow preventer.

Dose KORAL through automatic rinse additive injector or by hand dosing.

KORAL requires only a few millilitres to each litre of water.

Food Safety Statement:

With regard to the use of this product as a cleaner and / or sanitiser that may have incidental contact with food:

- 1) The raw materials / ingredients of this product are permitted as 'processing aids' as listed under clause 12 of the Food Standard Code 1.3.3 (Food Standards Australia New Zealand FSANZ) or
- 2) Are Generally Regarded As Safe (GRAS) according to the US Food and Drug Administration (FDA) or are recognised in the US Code of Federal Regulations (CFR) Title 21 part 178 as indirect food additives.

When used in accordance with the directions described in this product technical bulletin, this product complies with these recognised food safety parameters.

SHELF LIFE: As a quality assured manufacturer, Castle Chemicals has a stringent Quality assurance programme. As part of this regime, the label on this product shows a batch number and date of manufacture. This product has a shelf life of 24 months from the label printed date of manufacture. This information contained herein is based on data considered accurate. However, no warranty is expressed or implied regarding the accuracy of these data or the results to be obtained from the use thereof. Castle Chemicals assumes no responsibility for personal injury or property damage to vendees, users or third parties caused by the material. Such vendees or users assume all risks associated with the use of material.
