

MELON SHINE

Castle **Post Harvest**
Fruit that looks *good*, sells **first**

Fruit Coating

Product Description:

Castle Chemical's MELON SHINE is a product developed for waxing all types of melons. Waxing will: improve marketability, shrinkage control, visual appeal and improve arrivals. Once the wax has dried it forms a microfilm, which protects the fruit against abrasion.

Application:

The melons are generally washed or dry brushed to remove field dust and loose corky rind particles prior to waxing. Using Ag-Clean will assist with the removal of soil deposits. If using a dry brusher it should be equipped with a blower to remove dust and rind particles from the packinghouse.

MELON SHINE is use neat. Apply with a Micron 2000 for best application. The melons should be well dampened by the spray, then emerge from the drying chamber dry.

For best results dry the fruit prior to waxing.

SHELF LIFE:

As a quality assured manufacturer, Castle Chemicals has a stringent Quality assurance programme. As part of this regime, the label on this product shows a batch number and date of manufacture.
