

Odourzyme

Urine Digester

Product Description:

GREENPRO ODOURZYME Urine Digester has been developed with a concentrated Bio-Enzymatic formula containing selected strains of natural bacillus bacteria, enzyme cultures, an odour neutraliser and penetrating wetting agents.

The unique enzymatic activity of GREENPRO ODOURZYME Urine Digester allows for quick penetration, digestion, and removal of the toughest urine stains and soils.

Application:

Restrooms will often have a build up of urine in the tile & grout. When mopped over with a cleaning solution the uric acid is 'activated' and a strong urine odour occurs.

The application of GREENPRO ODOURZYME Urine Digester to the floors, urinals & toilets after cleaning will eliminate the uric acid causing the urine odour.

Waterless or non-flushing Urinals are another application for GREENPRO ODOURZYME. Continued use will assist in the reduction of build-up in the traps, flush rims & trap inserts.

GREENPRO ODOURZYME Urine Digester does not contain any hazardous chemicals nor any undesirable pathogens such as salmonella or pseudomonas. The all natural multi-strain bacteria & enzymes are able to break down and digest tough urine problems and stains.

DO NOT MIX WITH OTHER CHEMICALS!

Some individuals may be sensitive to product ingredients. Read product label and SDS before use.

Restrooms: Urine odours & Urine residuals.

- Use daily for the first week at an undiluted or 1:4 dilution. Then for weeks 2 & 3 use every second or third day at a 1:4 or 1:8 dilution. For weeks 4 & onward use once or twice a week at a 1:8 dilution.
- Spray or mop solution onto the tiles around the urinals and toilets – leave wet, do not rinse off.

Waterless & Non-Flushing Urinals

- Use daily at a 1:4-1:8 dilution to eliminate urine odour. Continued use will assist in the reduction of build-up in the traps, flush rims & trap inserts
- Drains will also benefit by reducing drain line sediments.

GreenPro

environmentally responsible solutions

Carpeting: Urine odours & Urine residuals

- Spray an undiluted or 1:4 dilution onto the carpet where the urine stain or odour is showing.
- Agitate the carpet fibres with a light bristle brush.
- Treat as often as necessary to overcome the urine odour. Two to three applications can be required, depending on the level of urine staining & uric acid build up.

Septic tank safe.

GREENPRO ODOURZYME Urine Digester is best stored in an area away from direct sunlight & temperatures below 40oC and above 10oC.

SHELF LIFE:

As a quality assured manufacturer, Castle Chemicals has a stringent Quality assurance programme. As part of this regime, the label on this product shows a batch number and date of manufacture.
