

# PINEAPPLE WAX

## Pineapple Coating

### Product Description:

PINEAPPLE WAX is a pineapple coating designed to reduce internal browning and extend shelf life. The concentrate contains a blend of natural ingredients that uniformly coat and adhere to the pineapple shell.

The improved coverage and adherence of this coating effectively reduces internal browning and retards degreening of the shell while providing a low sheen to the surface of the fruit.

### Application:

PINEAPPLE WAX may be applied to pineapples by spraying, drenching or dripping. Its recommended that fruit be rinsed clean, prior to waxing.

It helps to have the pineapples dry before waxing. This will result in better coverage of the wax.

It should be agitated prior to dilution. Add PINEAPPLE WAX slowly to dilution water and stir well before using. Solution should be homogenous and uniform of uniform colour.

Dilution rates can range from a ratio of one (1) part PINEAPPLE WAX to (3) parts soft water. We strongly recommend that the user conduct experiments to determine the proper dilution rate.

### Food Safety Statement:

1. The raw materials / ingredients of this product are permitted as 'processing aids' as listed under clause 12 of the Food Standard Code 1.3.3 (Food Standards Australia New Zealand FSANZ) or
2. Are Generally Regarded As Safe (GRAS) according to the US Food and Drug Administration (FDA) or are recognised in the US Code of Federal Regulations (CFR) Title 21 part 178 as indirect food additives.

When used in accordance with the directions described in this product technical bulletin, this product complies with these recognised food safety parameters.

### SHELF LIFE:

As a quality assured manufacturer, Castle Chemicals has a stringent Quality assurance programme. As part of this regime, the label on this product shows a batch number and date of manufacture. This product has a shelf life of 24 months from the label printed date of manufacture. This information contained herein is based on data considered accurate. However, no warranty is expressed or implied regarding the accuracy of these data or the results to be obtained from the use thereof. Castle Chemicals assumes no responsibility for personal injury or property damage to vendees, users or third parties caused by the material. Such vendees or users assume all risks associated with the use of material.
