## Wash N Wax

### Cleaner - Polish Compound

#### Product Description:

The maintenance of a sealed floor has always been a problem. Removing the soilage with one product and using another to promote gloss and black heel resistance. WASH N WAX has combined these two products into one. WASH N WAX effective cleaning action removes heavy build up of the most common and persistent soilages, whilst leaving behind a thin film of polyethylene which can be buffed into a magnificent gloss. WASH N WAX restores the appearance of a freshly laid polish film. It works to clean and repair heavily soiled and damaged floors.

1. A system of wetting and emulsifying agents attack and solubilise the heaviest of walked in grease and dirt without re depositing any residues.
2. A pleasant fragrance deodorises as it cleans.
3. Economical to use. Its high dilution rate saves both product and money.
4. Its unique polyethylene polymers protect and give a brilliant gloss to floors when buffed with a high speed machine.

WASH N WAX works best when used in conjunction with CASTLE SEAL which provides the easily maintainable surface. However, whatever the surface, WASH N WAX proves itself to be the best product for maintaining both cleanliness and gloss.

#### Application:

All sealed surfaces (except solvent based wax films) respond to WASH N WAX's unique cleaning action. Use WASH N WAX to maintain a standard of excellence on surfaces such as vinyl asbestos, terrazzo, marble, linoleum, rubber and properly sealed timber flooring.

WASH N WAX can be used either by mop and bucket or in automatic scrubbers for large areas such as shopping malls, supermarkets, airport terminals, department stores, clubs and schools.

#### MOPPING

Mop floors with a lightly wrung out mop to remove dirt film. Allow a few minutes to dry and buff with a high speed machine with a buffing pad to a mirror like gloss if required.

LIGHT DUTY	1 part WASH N WAX to 80 parts of hot or cold water.
HEAVY DUTY	1 part WASH N WAX to 30 parts of hot or cold water.

#### AUTOMATIC SCRUBBERS

Fill tank with required amount of WASH N WAX, scrub floors making sure that machine's squeegee has picked up most of the solution.

Allow to dry then machine to a mirror like gloss.

LIGHT DUTY	1 part WASH N WAX to 90 parts of hot or cold water
HEAVY DUTY	1 part WASH N WAX to 50 parts of hot or cold water.
