PREMIUM POTTED PLANTS

To whom it may concern.

We have been using Multiphen for a few years now. It was recommended to us by a strawberry farmer from Toolangi in Vic. We use this product to disinfect and clean our growing benches in between each of our crop cycles. It is easy to use, by simply added a small amount of Multiphen solution to the growing bench, our staff then scrub the benches to remove as much dirt, grime, algae etc. The solution is then washed off with clean water giving us a clean and disinfected surface to start a new crop phase.

I would highly recommend this product to the Horticultural or Agricultural industries for cleaning and disinfecting of all your work surfaces and equipment.

Regards

Nick Wall
