

CARNAUBA ULTRA NATURAL (W-EU)

Shellac and Morpholine Free Apple Wax

Product Description:

CARNAUBA ULTRA NATURAL (W-EU) is a high solids, carnauba wax emulsion product designed to function as a post harvest coating for apples. CARNAUBA ULTRA NATURAL (W-EU) has no morpholine and no shellac in its formulation.

CARNAUBA ULTRA NATURAL (W-EU) complies with EU coatings standards, which is suitable for both export and domestic shipments. CARNAUBA ULTRA NATURAL (W-EU) provides improved resistance to whitening and hazing while limiting the weight loss associated with long-term storage. Movement of fruit from cold store to humid climate can induce condensation or allow fruit to 'sweat'. In some instances whitening may occur in certain circumstances

Application:

CARNAUBA NATURAL EU is best applied through the Micron 2000. It is important to have the apples dry before waxing. Preparation is most important before waxing. This will result in long lasting shine. CARNAUBA NATURAL EU can be applied at a rate of between 800ml to 1 litre per tonne of fruit.

Food Safety Statement:

With regard to the use of this product as a Food Additive (Standard 1.3.1) to meet the requirements of Australian New Zealand Food Standards Code, Standard 2.3.1: Surface Treated fruit and vegetables: 1) The raw materials / ingredients of this product are permitted as Food additives under schedule 1 of the code, and 2) Meet the Identity and Purity requirements of Standard 1.3.4 Clause 1 (a), or 3) Are Generally Regarded As Safe (GRAS) according to the US Food and Drug Administration (FDA) or are recognised in the US Code of Federal Regulations (CFR) Title 21 part 178 as indirect food additives.

When used in accordance with the directions described in this product technical bulletin, this product complies with these recognised food safety parameters.
