# Technical Bulletin CIDAL

# **Food Surface Sanitation**

# **Product Description:**

CIDAL is a blend of quaternary ammonium compounds designed to disinfect, deodorise and sanitise food contact surfaces. CIDAL will remain active against microbes for many hours, which makes them useful to apply at the end of the day. CIDAL is active over a wide pH, has a natural detergent action and works well at high temperatures. After applying CIDAL do not rinse off.

Regular maintenance and sanitation will ensure that any contamination is quickly removed before a problem occurs.

## **Application:**

### **Bin Steriliser:**

Dilute 1 litre of CIDAL to 80 litres with water. Make sure the bins have been cleaned first removing all the organic matter before applying CIDAL.

### Rollers, Brushes, Belts and Equipment:

Dilute 1 litre CIDAL to 150 litres with water. Wipe down belts and equipment before applying CIDAL.

### **Fungicide Tanks:**

Dilute 1 litre of CIDAL to 80 parts with water. Make sure you clean out the holding tank completely before applying CIDAL

Not to be used for washing fruit.

### **SHELF LIFE:**

As a quality assured manufacturer, Castle Chemicals has a stringent Quality assurance programme. As part of this regime, the label on this product shows a batch number and date of manufacture. This product has a shelf life of 24 months from the label printed date of manufacture. This information contained herein is based on data considered accurate. However, no warranty is expressed or implied regarding the accuracy of these data or the results to be obtained from the use thereof. Castle Chemicals assumes no responsibility for personal injury or property damage to vendees, users or third parties caused by the material. Such vendees or users assume all risks associated with the use of material.
