

Wash Mac

Alkaline Machine Dishwasher Liquid Detergent

Product Description:

WASH MAC is described as an auto feed machine washing detergent, which exhibits all the horsepower usually associated with concentrated powders together with all the advantages of a liquid.

WASH MAC performs at an economical concentration in soft or hard water and removes all soils including those thought to be very difficult to remove in an automatic operation. Tannin stains are also removed and prevented with routine use.

Additionally WASH MAC reduces or eliminates foaming which clogs pumps and cushions the impact of the spray and is corrosion safe on all metals commonly used in the construction of commercial dish washing machines, although aluminium kitchen ware will be discoloured if in contact with WASH MAC.

Application:

WASH MAC is manufactured specifically for use in dishwashing and Autoclave machines. It should be dispensed by means of an electronic detergent feeder, which gives absolute control over detergent usage, resulting in minimum operating costs.

WASH MAC MUST NOT be used for hand washing of dishes.

Food Safety Statement:

With regard to the use of this product as a cleaner and / or sanitiser that may have incidental contact with food:

- 1) The raw materials / ingredients of this product are permitted as 'processing aids' as listed under clause 12 of the Food Standard Code 1.3.3 (Food Standards Australia New Zealand FSANZ) or
- 2) Are Generally Regarded As Safe (GRAS) according to the US Food and Drug Administration (FDA) or are recognised in the US Code of Federal Regulations (CFR) Title 21 part 178 as indirect food additives.

When used in accordance with the directions described in this product technical bulletin, this product complies with these recognised food safety parameters.
