ALPHA PRE-SOAK/ ALPHA BOOST

Product Description:

ALPHA PRESOAK and ALPHA BOOST are revolutionary solutions that set a new standard in the Car Wash Industry with its advanced synergistic formula providing unprecedented cleaning performance. This powerful combination of surfactants and reduced levels of alkaline boosters ensures a safer cleaning process for vehicles, equipment, and site operators. The reduced Alkalinity ensures there are no irritating or hazardous mists or odours when being sprayed. Although lower in hazardous caustic-based chemicals, the exceptional capabilities of ALPHA will provide an unrivalled level of clean.

ALPHA PRESOAK and ALPHA BOOST are the latest generation of alkaline presoaks, effortlessly removing layered organic soils that accumulate on the vehicle's surface. When used in combination with ALPHA LOW pH, the system can deliver up to 50% better cleaning results compared to other products. This then allows for improved application of Tri foam ceramic and graphene + ceramic protectants. For regular maintenance washes, there's nothing better than having your vehicles go through the auto car wash with this powerful trio. Nothing Cleans like Alpha....Nothing.

In situations where ALPHA LOW pH is not used, we recommend utilising 2 passes of ALPHA PRESOAK/ALPHA BOOST to achieve the desired level of cleanliness.

Features for Benefits

- Lower Alkalinity = Safer on Vehicles, Equipment & Site Operator
- NO choking smell or gasses produced - Safer, more pleasant for operators, no EPA complaints.
- Liquid - No mixing, exact proportions of all chemicals, consistent clean each time, no caustic haze - less re-washing of cars, improved customer satisfaction
- Increased Cleaning power = cuts through organic soils, can often eliminate pre-cleaning
- Single Pass Application = Higher vehicle throughput
- Show room finish = Improves Tri foam conditioners & protectant performance
- Versatile = used in Auto Touch Free, Tunnel and Self-Serve

Application:

Alpha is best applied through on-site set-up by Castle's specialist installer who will determine best application rates, based on equipment type, be it tunnel or in bay auto.

Handling Precautions: Keep out of reach of children. May be harmful if swallowed. Avoid contact with skin and eyes. Wear suitable eye protection and rubber gloves when handling this product. Castle Chemicals advocates that care be taken when using all chemical cleaning products. For further information, please consult the Safety Data Sheet.

MANUFACTURED BY CASTLE CHEMICALS IN AUSTRALIA.

DEVELOPED TO SUIT SPECIALIST COATING AND PAINT PROTECTION/ The ALPHA detergents, Ceramic TriFoams, Ceramic/Graphene Protectants, and Drying Aids compliment and enhance paint protection and will not void your warranty.

SHelf LIFE: As a quality assured manufacturer, Castle Chemicals has a stringent Quality assurance programme. As part of this regime, the label on this product shows a batch number and date of manufacture. This product has a shelf life of 12 months from the label printed date of manufacture. This information contained herein is based on data considered accurate. However, no warranty is expressed or implied regarding the accuracy of these data or the results to be obtained from the use thereof. Castle Chemicals assumes no responsibility for personal injury or property damage to vendees, users or third parties caused by the material. Such vendees or users assume all risks associated with the use of material.
