

POOCH'S STOP ITCH RINSE (Concentrated)

Features Natural Pyrethrins for Itching control

Features for Benefits

- Contains the natural insecticide Pyrethrin for flea and tick control. Residual stops reattachment for several days.
- Leaves the coat shiny and with a pleasant floral residual fragrance.
- Can be used on its own if the pet is not too dirty, otherwise use any of the Pooch's cleansing shampoos first before applying the rinse.
- Can be made up into a rinse, dip or spray and applied onto the coat for bathing or after and between baths.
- Does not need to be washed off as the residual effect of the rinse works long after application.
- Suitable for grooming facilities, Hydrobaths, and home bathing applications.

Note! (Caution)

- The product is safe to use on cats, however we suggest a light spray rather than soaking the pet fully and take particular care to avoid the mouth and eyes. Towel dry well afterwards.

When using in a Hydrobath

- Dilute Pooch's concentrate at 1:100 (10ml in 1L water). This can be done via the Hydrobath dispenser or in the bottom of the Hydrobath tub.
- Place the dog in the bath and commence washing with the Hydrobath.
- Make sure that the pets coat is thoroughly wet with the product, and you get under the stomach and the hard-to-get places.
- Ensure that you don't get the rinse in your pets eyes, ears or nose.
- The diluted Pooch's rinse does not need to be washed off as the residual effect of the rinse works long after application and leaves the coat looking good and smelling pleasant.
- Dry the pet off as usual.

Technical Bulletin

When using as a Rinse or Dip

- Dilute Pooch's concentrate at 1:100 (10ml in 1L water). This can be done in the bottom of the tub or bath.
- Place the dog or cat in the bath and wet a wash flannel or cloth with the diluted solution.
- Apply the diluted Pooch's Rinse Concentrate to the pets coat and make sure that it penetrates through the upper layer of the coat to the skin.
- Make sure that the pets coat is thoroughly wet with the rinse, but you don't get any solution in your pets eyes, ears, or nose.
- The rinse does not need to be washed off as the residual effect of the rinse works long after application and leaves the coat looking good and smelling pleasant.
- Remove the pet from the bath and towel or blow dry the pet after running a brush over the coat to smooth it down.
-

When using as a Spray

- Prepare a dilution of the Pooch's Rinse Concentrate as per the instructions on the label being 1:100 (10ml in 1L water).
- A measured spray bottle can be used and then water added. Shake to mix well.
- Spray pet all over making sure you part the coat so that it penetrates through the upper layer of the coat to the skin.
- Ensure to not get any solution in your pets eyes, ears, or nose.
- Does not need to be washed off as the residual effect of the rinse works long after application and leaves the coat looking good and smelling pleasant.
- Towel or blow dry the pet after running a brush over the coat to smooth it down.

Make sure you dispose of any leftover solution responsibly.

Composition: Pyrethrins 10g/L, Piperonyl Butoxide 18g/L, N-Octyl Bicycloheptene Dicarboximide 30g/L.

Packaging: Product Code 21267

Carton 5L
