

20Lt Drum
Code: 00120NTALL63

Castle chemicals moving away from 25Ltr cubes to the 20Ltr space saver drum.

Customers will start to see our commercial and industrial products being supplied in the same 20l drum we introduced to our carwash division in 2022.

The drum was designed by the Pact Group (visy) for the ag-chem industry to allow the same volume (800l - 40 x 20ltr) to be packed on a pallet compared to 32 x 25ltr (800ltr).

Features

- 800l per pallet – same cost in transport per ltr v 25l drums
- Less weight per drum - meets transport company restrictions and easier for customers
- 63mm cap – designed for no glug when pouring, arrow direction in drum
- Tap in cap available - safer option then bottom screw in bung
- 63mm drum stem available - for drums connected to dispensers

Tap in Cap
Code: 29137

Stem
Code: 201STEM

63mm Drum Spanner
Code: 29445-63MM
