

IN-HIBIT

CONCENTRATED UNDERBODY CORROSION INHIBITOR

Product Description:

Aquashine IN-HIBIT is a water-based Organic Citrate Passivation & Polymeric Amine Inhibitor product that forms a chemical bond to the underbody of vehicles. This film is resistant to salt penetration, and water washing. IN-HIBIT is suited to in-bay autos or tunnel wash equipment. As a spray on application IN-HIBIT reduces corrosion of underbody metal.

Features and Benefits

- Improves corrosion control with regular application
- Foam-on or Spray-on application
- Concentrated to allow low in-use cost

Physical Characteristics

- Colour: Purple
- Odour: Citrus
- Foam: Moderate
- pH 1%: 9.5–10.5
- Biodegradable

Application Guide / Use Application

- For Hydrominder use: Under sealer Application Dilute at 100:1.
- For direct injection metering pump applications 20-30mL per vehicle pass.
- Product cannot be titrated, measure by volumetric calibration.

Technical Bulletin

IN-HIBIT Corrosion testing:

As part of the laboratory development program for Castle Aquashine 'IN-HIBIT' underbody spray product, a corrosion inhibition test was undertaken.

Three steel coupons were prepared:

- A) Control, no treatment given
- B) Sprayed with weak salt solution (50mg/L NaCl) then rinsed with 10 second high pressure spray of 1:100 Castle Aquashine IN-HIBIT.
- C) Sprayed with weak salt solution (50mg/L NaCl) then rinsed with 10 seconds high pressure spray of plain water (town main sourced).

All coupons were then left in an open lab environment for 10 days.

**Before
Spray Application**

**After
10-Day Period**

Coupon B (Sprayed with IN-HIBIT) is still bright and free from corrosion, it is still as good as the control; A.

Coupon C (No IN-HIBIT) shows rust and general corrosion on faces, edges and in hole.

Conclusion: Castle Chemicals 'IN-HIBIT' provides excellent corrosion protection of bare steel, even after salt spray application.

SHELF LIFE:As a quality assured manufacturer, Castle Chemicals has a stringent Quality assurance programme. As part of this regime, the label on this product shows a batch number and date of manufacture. This product has a shelf life of **24 months** from the label printed date of manufacture.
