

Smart Chemical Monitoring for Your Business

With **Sentry Level Monitoring**, you'll never run out of critical chemicals again.

This smart system reduces waste, eliminates costly emergency deliveries, and makes ordering and inventory management a breeze. By ensuring a steady supply, Sentry helps maintain consistent wash quality for happier customers.

Designed to fit everything from 20L, 220L or 1000L, Sentry is optimized for Castle reservoirs while remaining fully compatible with others.

Optional Add-Ons

- + **Wireless Tank Integration:** Add a wide range of chemical reservoirs to the one dashboard
- + **Advanced Analytics:** Detailed usage trends, seasonal insights, and multi-site comparisons

Why Operators Choose Sentry Level monitoring

- ✓ **Real-time Monitoring**
Track your most important fast-moving chemicals with precision sensors
- ✓ **Smart Alerts**
Get notified when levels drop below your set thresholds
- ✓ **Usage Forecasting**
See estimated days remaining based on 7-day usage averages
- ✓ **Auto Refill Detection**
System recognizes when drums or reservoirs are topped up
- ✓ **Expandable System**
Monitor 8+ channels from a single hub
- ✓ **Industry Tough**
Water and chemical resistant sensors built for car wash environments
- ✓ **Australian Made & Tailored**
Developed in Australia by Castle Chemicals with deep industry knowledge. Software customization available to match your specific operational needs and workflow
