

Manual Sanitisation of plates and cutlery With Cidal

STEP 1 WASH

Wash pre-scraped dishes in Castle [GreenPro Supergreen](#).

STEP 2 RINSE

Rinse off.

STEP 3 SANITISE

Leave dishes in tub container solution of [Cidal](#) for at least 60 seconds. 1:500 dilution, 2.0ml per Lt. Use water at ideally 20–40°C, this will improve drying time. Immerse items completely.

Check dispensed solution at least daily to ensure proper sanitisation is maintained.

STEP 4 AIR DRY

Allow cleaned, rinsed and sanitised dishes to air dry. **DO NOT** wipe with a towel.

Cutlery must be stacked
HANDLE UP ONLY

Using Quaternary Test Strips:

- 1 - Remove single test strip.
- 2 - Dip test strip into sanitising solution for 30 seconds
- 3 - Compare colour of test end to chart.
- 4 - Check to make sure you have 150ppm
