Classic Powder Soft

Residual Deodorant Air Freshener Sanitiser
Product Code: 24144

Product Description

CLASSIC POWDER SOFT is a concentrated liquid air freshener and deodoriser with a soft, powder-fresh fragrance. It helps mask unpleasant odours and leaves rooms and treated surfaces smelling fresh. The liquid concentrate can be diluted for routine use and applied by a suitable spray bottle.

Applications

Suitable for routine deodorising in hotels, motels, resorts, offices, schools, aged care facilities, homes and buses. Use in washrooms, accommodation rooms, common areas and other spaces affected by everyday odours, including smoke perspiration and food odours.

Use as a part of a regular cleaning programme. For best results, remove the source of the odour, clean affected surfaces before applying. Deodorising complements cleaning and does not replace the removal of waste, spills or other contamination.

Directions for Use

Dilution: Dilute with up to 30 parts water to 1 part product, depending on the level of fragrance required. For example, add 100 mL of product to 3 L of water and mix gently.

Air Freshening: Spray sparingly into the room, away from people, food and exposed food-contact surfaces. Allow the fragrance to disperse before deciding whether further application is needed.

Surface Deodorising: First remove the source of the odour and clean away any soil. Lightly spray the diluted solution onto a suitable surface. Avoid over-wetting and allow to dry. Test on an inconspicuous area before use, particularly on fabric and delicate finishes. Wipe up any overspray promptly.

Handling and Storage

Do not mix with other chemicals. Keep the container tightly closed and store in a cool, well-ventilated place away from heat and ignition sources. Refer to the Safety Data Sheet for handling, personal protection and first aid information.

Shelf-Life

As a quality assured manufacturer, Castle Chemicals has a stringent Quality assurance programme. As part of this regime, the label on this product shows a batch number and date of manufacture. This product has a shelf life of 24 months from the label printed date of manufacture. This information contained herein is based on data considered accurate. However, no warranty is expressed or implied regarding the accuracy of these data or the results to be obtained from the use thereof. Castle Chemicals assumes no responsibility for personal injury or property damage to vendees, users or third parties caused by the material. Such vendees or users assume all risks associated with the use of material.
